

Code :Semantic_SDG_Mapping.py

1. Comments:

- The comments are present but could be more detailed, especially in explaining the logic of complex functions.

2. README File:

- There's no mention of a README file in the provided code.

3. Code Understandability:

- The code is generally understandable, but the lack of detailed comments in some parts makes it challenging.

4. Coding Standards:

- The code mostly follows PEP 8 guidelines but variable and function names could be more descriptive .

5. Code Duplication:

- There is no significant code duplication.

6. Unit Testing / Debugging:

- The code is modular enough to facilitate unit testing and debugging.

7. Function/Class Size and Responsibilities:

- Most of the functions are small and modular except some rare cases, but that is due to the calculations, not too many responsibilities.

8. Code Formatting:

- The code is mostly well-formatted.

9. Code Reusability:

- The code looks reusable for the most part.
